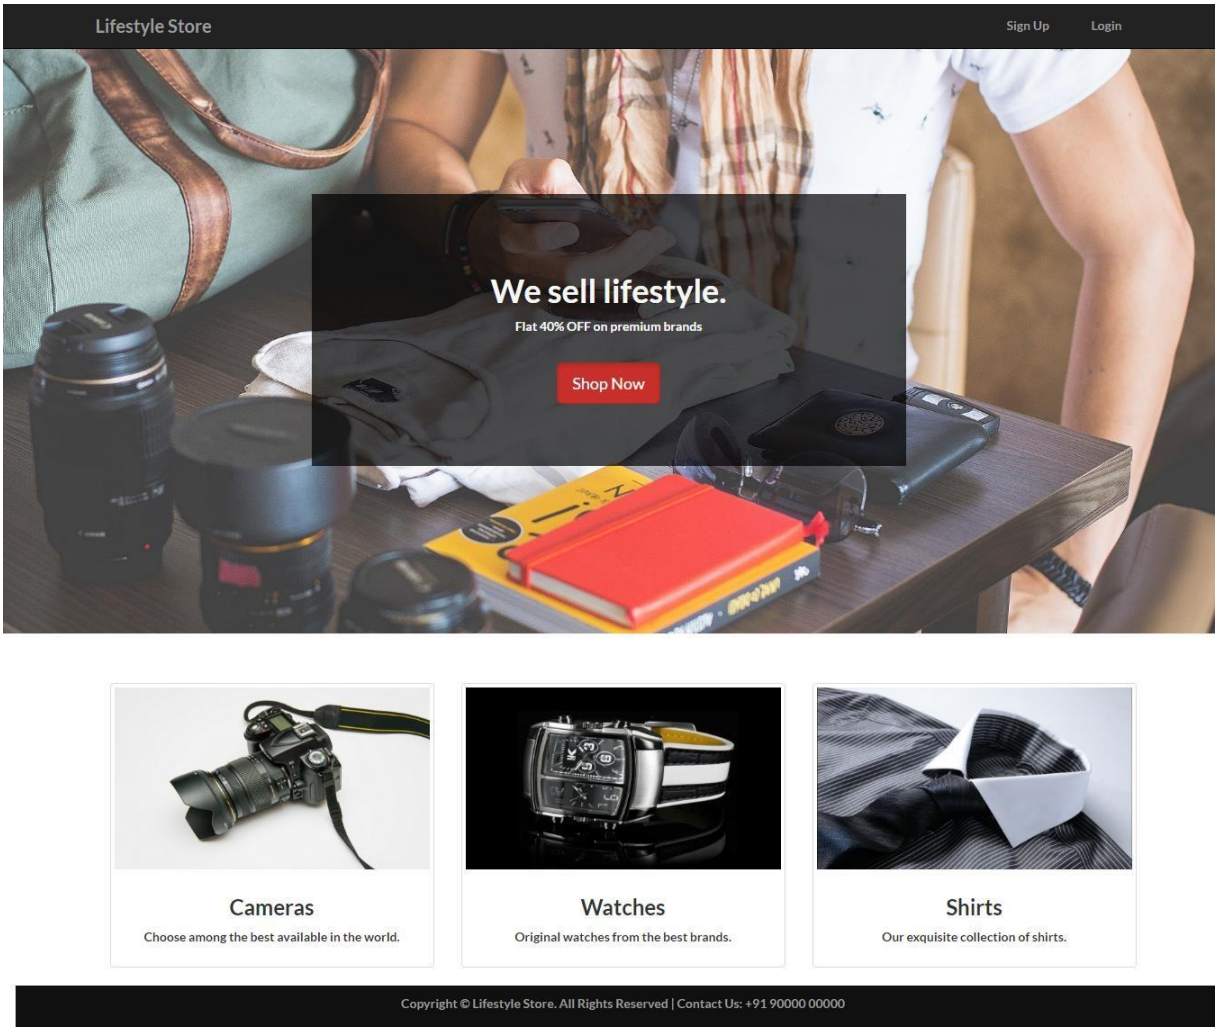
# Assignment: I

**Problem Statement**

Hey! Now that you're familiar with HTML & CSS, you will create an **index page** for the e-commerce website.

**Description:** The index page is usually the first page that a user sees when he/she visits a website. This is how our index page should look like:



This is a web page contains three sections:

1. Header
2. Content
3. Footer

**Header:** This is the first section of the webpage and it contains the "The Lifestyle Store" as a website name and navigation links to login and signup page.

**Content:** This section has two parts banner image with a **Shop Now** button over it and item category listing section.

**Footer:** The footer contains text "Copyright @ Lifestyle Store. All Rights Reserved | Contact Us: +91 90000 00000 "
